

Founded in 1985, Allergy & Asthma Network Mothers of Asthmatics (AANMA) is a national nonprofit health organization whose mission is to eliminate suffering and death due to asthma and allergies through education, advocacy, and community outreach.

AANMA convened the Consumer Health Alliance for Safe Medication (CHASM), a working group of patient and professional healthcare associations, to ensure patients with respiratory conditions have access to safe and effective medications and are protected from products that may pose unwarranted risks. These respiratory conditions include asthma, cystic fibrosis, pneumonia and chronic obstructive pulmonary diseases (COPD).
